TO THE MEMBERS OF THE CORPORATION
OF ST. LUKE'S HOSPITAL, SAN FRANCISCO

It is gratifying to feel that St. Luke's Hospital is continuing efficient service to the Community, and that it's financial condition is somewhat improved.

Grateful acknowledgment is made of receipt during the fiscal year of bequests and additions to our Endowment Funds, from the Estates of:

Julia Bragg	\$ 2,000.00
Mary M. Latham	11,381.60
Luke Kavanagh	337.44
Alice B. Talbott	1,000.00

Various donations and gifts to Endowment Funds, amounting to \$16,347.74 were received. Other funds were increased by \$1,593.95. The Katharine and Harry Babcock Fund, and the Irwin Fund (Dr. Weeks') furnished \$8,084.89 and \$10,274.45 respectively, for hospitalization of worthy individuals.

The reports of Staff service and financial assistance to worthy people in need of medical and hospital care, should afford all of us the sincerest satisfaction.

Reports in detail by Doctor Johnson and the various Department Heads contain much of information and interest concerning the work of the hospital for the past year.

In transmitting this Report to the Corporation, may I express my sincere appreciation of the loyal support of our Board members and of the hospital personnel.

KENNETH MONTEAGLE
President

TO THE MEMBERS OF THE CORPORATION
OF ST. LUKE'S HOSPITAL, SAN FRANCISCO

It is gratifying to feel that St. Luke's Hospital is continuing efficient service to the Community, and that its financial condition is somewhat improved.

Grateful acknowledgment is made of receipts during the fiscal year of bequests and additions to our endowment funds, from the estates of:

Julia Bragg	2,000.00
Mary M. Latham	11,881.80
Luke Kavanagh	337.44
Alice B. Talbot	1,000.00

Various donations and gifts to Endowment Funds, amounting to \$18,347.74 were received. Other funds were increased by \$1,593.95. The Katharine and Harry Babcock Fund, and the Irwin Fund (Dr. Weeks') Turned \$8,084.89 and \$10,274.45 respectively, for hospitalization of worthy individuals.

The reports of staff service and financial assistance to worthy people in need of medical and hospital care, should afford all of us the sincerest satisfaction.

Reports in detail by Doctor Johnson and the various Department Heads contain much of information and interest concerning the work of the hospital for the past year.

In transmitting this Report to the Corporation, may I express my sincere appreciation of the loyal support of our Board members and of the hospital personnel.

LEWIS MONTAGUE
President

The President and Board of Directors
St. Luke's Hospital
San Francisco, California

To the Board of Directors
St. Luke's Hospital

Gentlemen:

I have the honor to submit the Hospital Report for the year July 1, 1939 to June 30, 1940.

Before taking up the report for the year, it seems fitting we should memorialize the personality of Mr. Louis F. Monteagle, whose presence has gone from us, but whose inspiration is still with us.

One of the most notable factors connected with the growth and scientific advancement of St. Luke's Hospital has been the satisfaction Mr. Monteagle took in the knowledge of it. His interest and enthusiasm we have tried to translate into our work.

So we at St. Luke's miss his presence, we miss the fine uplift of his strong, capable, inspiring personality. His going leaves for all of us an empty place.

These are the sentiments and feelings of all of us.

TRENDS IN HOSPITAL ECONOMICS

The steady uptrend in hospital costs during the years 1936-1939 appears to have reached its peak in 1940. Responsible for this uptrend were advances in technic, nursing requirements, labor demands and nurse training costs.

New and improved methods, equipment and service have done much to relieve disease and suffering. Diagnostic procedures have advanced remarkably in range and utility. Most advances have been accompanied by increases in cost. New drugs, such as sulfanilamide, have brought within the reach of everyone, certain and sure cure of numbers of conditions, some of which have required enormously expensive sera or treatment not available in most cases because of expense.

Nursing procedure and technical methods have become more complicated and exacting. There is a constantly increasing demand for more and better nursing. General duty nursing expense during the past four years has advanced from approximately \$36,000.00 to about \$80,000.00.

To the Board of Directors
St. Luke's Hospital

Gentlemen:

I have the honor to submit the Hospital Report
for the year July 1, 1939 to June 30, 1940.

Before taking up the report for the year, it
seems fitting we should memorialize the personality of Mr.
Louis T. Monteggia, whose presence has gone from us, but
whose inspiration is still with us.

One of the most notable factors connected with
the growth and scientific advancement of St. Luke's Hospital
has been the satisfaction Mr. Monteggia took in the knowledge
of it. His interest and enthusiasm have been tried to trans-
late into our work.

So we at St. Luke's miss his presence, we miss
the fine uplift of his strong, capable, inspiring personality.
His going leaves for all of us an empty place.

These are the sentiments and feelings of all of us.

TRENDS IN HOSPITAL ECONOMICS

The steady upward in hospital costs
during the years 1936-1939 appears to
have reached its peak in 1940. Respon-
sible for this upward were advances in technic, nursing
requirements, labor demands and nurse training costs.

New and improved methods, equipment
and service have done much to relieve disease and suffering.
Diagnostic procedures have advanced remarkably in range and
utility. Most advances have been accompanied by increases in
cost. New drugs, such as sulfonamides, have brought within
the reach of everyone, certain and sure cure of hundreds of con-
ditions, some of which have required enormously expensive ser-
vice or treatment not available in most cases because of expense.

Nursing procedure and technical
methods have become more complicated and exacting. There is
a constantly increasing demand for more and better nursing.
General daily nursing expense during the past four years has
advanced from approximately \$8,000.00 to about \$20,000.00.

Nurse training, since passage of the long overdue Nurse Training Amendment, has caused considerable confusion in many hospitals, and the elimination of several nurse training courses. Our own Training School problems are well on the way to solution. Students are paying approximately \$7,000.00 a year of our Training School costs. We are gradually eliminating study courses which can be, and should be taken in Junior College, prior to admission. Preliminary students admitted this year have better than Junior College rating, and the rating for the entire School is approximately that of Junior College training. Our third year students, beginning this year, will have no class room instruction. This will enable them to devote the entire year to clinical experience at the bedside. Although tuition does not cover the entire cost of training, as now arranged, one full year of bedside duty will do much to relieve the demand for general duty nurses. Each general duty nurse costs about \$120.00 a month.

With military training a certainty, and war a probability, we are faced with a very definite problem in the nursing field, namely, supply of general duty nurses. This problem can be solved very readily by training nursing aides, who will be available to fill the ranks vacated by trained nurses required for service in general and camp hospitals. This matter has been taken up with our Training School and preparation for the expected scarcity of registered nurses has been undertaken. Hospitals should do everything possible to release graduates for war duty, and at the same time avoid the emergency shortage in registered nurses of World War I, which lead to the establishment of numbers of inferior Schools, lowered standards, and the twenty-eight month training course, that we have just eliminated. The registered nurse - "trained-aide" system should be used more widely, even in these times. Our experience in this war may lead to the development of a hospital nursing system which will result in a considerable reduction in general duty nursing expense, and patients' bills.

Labor costs have remained stationary following the marked rise in 1937. A demand for increased pay for institutional workers a year ago, has been successfully postponed.

As a result of the uptrend in the foregoing factors of present-day hospital service, patients' bills increased from \$8.05 per day, to \$10.16 per day from 1936 to 1939, followed by a decrease in 1939-40 to \$10.01. Patients' bills have been reduced approximately fifteen cents per day, and hospital expense has been reduced six cents per patient day.

Increase in the average cost of hospital service is inevitable, as a result of the logical demand for new and improved methods in the treatment of disease and injury. Efficiency and economy in the administration of hospitals have become more general and essential.

Nurse training, since passage of the long overdue Nurse Training Amendment, has caused considerable confusion in many hospitals, and the elimination of several nurse training courses. Our own Training School problems are well on the way to solution. Students are paying approximately \$7,000.00 a year for our Training School costs. We are gradually eliminating study courses which can be, and should be taken in Junior College, prior to admission. Preliminary students admitted this year have better than Junior College rating, and the rating for the entire school is approximately that of Junior College training. Our third year students, beginning this year, will have no class room instruction. This will enable them to devote the entire year to clinical experience at the bedside. Although tuition does not cover the entire cost of training, as now arranged, one full year of bedside duty will do much to relieve the demand for general duty nurses. Each general duty nurse costs about \$120.00 a month.

With military training a certainty, and war a probability, we are faced with a very definite problem in the nursing field, namely, supply of general duty nurses. This problem can be solved very readily by training nursing aides, who will be available to fill the ranks vacated by trained nurses required for service in general and camp hospitals. This matter has been taken up with our Training School and preparation for the expected scarcity of registered nurses has been undertaken. Hospitals should do everything possible to release graduates for war duty, and at the same time avoid the emergency shortage in registered nurses of World War I, which led to the establishment of numbers of inferior schools, lowered standards, and the twenty-eight month training course, that we have just eliminated. The registered nurse - "trained-aide" system should be used more widely, even in these times. Our experience in this war may lead to the development of a hospital nursing system which will result in a considerable reduction in general duty nursing expense, and patients' bills.

Labor costs have remained stationary following the marked rise in 1937. A demand for increased pay for institution-aid workers a year ago, has been successfully postponed.

As a result of the upward in the foregoing factors of present-day hospital services, patients' bills increased from \$8.05 per day, to \$10.16 per day from 1936 to 1939, followed by a decrease in 1939-40 to \$10.01. Patients' bills have been reduced approximately fifteen cents per day, and hospital expense has been reduced six cents per patient day.

Increase in the average cost of hospital services is inevitable, as a result of the logical demand for new and improved methods in the treatment of disease and injury. Efficiency and economy in the administration of hospitals have become more general and essential.

Practical means of paying hospital bills for necessarily expensive and life-saving procedures have been devised by hospitals themselves, through group or hospital service insurance. This insurance is within the means of all but the unemployed or indigent - the latter for whom St. Luke's is responsible are very well protected by splendid endowments and special funds for the care of the worthy sick. Group or hospital service insurance furnishes facilities for even the well-to-do, which will meet the high cost of hospitalization or the occasional hospital bill which would otherwise be beyond the means of most of us.

SUMMARY OF HOSPITAL OPERATION

Figures under almost every heading are higher than those of last year; notably: Patients Treated increased from 5191 to 5334; Daily Average from 149.7 to 153.3; Patient Days from 54,642 to 56,080. Collections were approximately \$18,000.00 higher than last year. Free Treatment and Discounts a little over \$6,000.00 more than last year. Laboratory and X-ray each showed a gain in work done; X-ray approximately 1500 examinations, and Laboratory 5000 procedures.

The number of operations for the year was lower by over 200. The Patient Day Cost dropped fifteen cents. The Cost of Subsistence was seven cents less than last year.

STAFF

Professional Staff Service to endowment patients amounted in dollars and cents to a little over \$48,000.00.

Several contributions were made to medical literature by our Staff members.

HOUSE STAFF

We have had a very well trained and efficient House Staff, consisting of seven Residents and four Interns. Each year the young men of the House Staff show increasing evidence of superior training. The work they do for patients, and visiting physicians is of a high order. In these days of complicated procedure, their work is much appreciated by the Staff, the hospital and its patients.

TRAINING SCHOOL

Miss Harrison's report, page 16, is well worth careful reading. Nursing Home facilities have been re-arranged and improved. The notable increase in scholastic standing and training is gratifying.

OUT PATIENT DEPARTMENT

This department continues to afford much needed care to increasing numbers in this area. The Eye Clinic

Practical means of paying hospital bills for necessary expensive and life-saving procedures have been devised by hospital-aid themselves, through group or hospital service insurance. This insurance is within the means of all but the unemployed or indigent - the latter for whom St. Luke's is responsible. The well-protected by splendid endowments and special funds for the care of the worthy sick. Group or hospital service insurance furnishes facilities for even the well-to-do, which will meet the high cost of hospitalization or the occasional hospital bill which would otherwise be beyond the means of most of us.

HOSPITAL OPERATION

Figures under almost every heading are higher than those of last year; notably: Patients Treated increased from 5191 to 5334; Daily Average from 149.7 to 155.3; Collections were approximately \$18,000.00 higher than last year. Free treatment and discounts a little over \$6,000.00 more than last year. Laboratory and X-ray each showed a gain in work done; X-ray approximately 1500 examinations, and Laboratory 5000 procedures.

The number of operations for the year was lower by over 200. The Patient Day Cost dropped fifteen cents. The Cost of subsistence was seven cents less than last year.

STAFF

Professional Staff service to endowment patients amounted in dollars and cents to a little over \$48,000.00.

Several contributions were made to medical literature by our staff members.

HOUSE STAFF

We have had a very well trained and efficient House Staff, consisting of seven residents and four interns. Each year the young men of the House Staff show increasing evidence of superior training. The work they do for patients, and visiting physicians is of a high order. In these days of complicated procedure, their work is much appreciated by the staff, the hospital and its patients.

TRAINING SCHOOL

Miss Harrison's report, page 16, is well worth careful reading. Nursing Home facilities have been re-arranged and improved. The notable increase in scholarship standing and training is gratifying.

OUT PATIENT DEPARTMENT

This department continues to afford much needed care to increasing numbers in this area. The Eye Clinic

deserves particular mention. The recent establishment of the Childrens' Clinic, on the second floor, will facilitate the work of this Clinic, as well as in the Clinic in general.

SERVICE DEPARTMENT

The power plant, laundry, storeroom, shop and wells are in excellent condition and operating efficiently. The supply of well water has continued at a high level for a much longer time this year than usual. As a safety factor, it seemed wise to chlorinate our water supply. The chlorination equipment is working satisfactorily from the mechanical standpoint. The bacteria count has been greatly reduced, as observed by our own Laboratory and the Department of Health, which has cooperated with us in obtaining what we now consider a well protected water supply.

Numerous improvements in our plumbing and water lines have been made, with the idea of eliminating cross-connections, siphonage, and danger of accidental contamination.

We are laying in a reserve supply of plumbing, engine room, and shop fittings and supplies, against the time when local dealers will be unable to supply us promptly as a result of the unusual rearmament demands.

MAINTENANCE

Considerable painting of equipment and buildings inside and out, will be required during the ensuing year.

Linoleum in the chart rooms, and in some patients' rooms will have to be replaced, after some sixteen years of use.

EQUIPMENT

Principal items of new and replaced equipment are:

Dietary Department:

1 Aluminum steam jacket 40 gallon kettle,
\$226.00

Silverware, \$227.00.

Pathology:

1 Refrigeration unit, and construction of refrigerator, \$400.00.

Laundry:

Motor repair, \$109.90.

Buildings:

New cables for elevator, and miscellaneous repair, \$350.00.

Fans, Westinghouse - new, \$114.00.

Repairs and renovation of mattresses, \$355.00.

Physiotherapy:

Diathermy equipment, \$275.00.

deserves particular mention. The recent establishment of the
Children's Clinic, on the second floor, will facilitate the
work of this clinic, as well as the clinic in general.

SERVICE DEPARTMENT

The power plant, laundry, storeroom,
shop and vaults are in excellent condition
and operating efficiently. The supply of
well water has continued at a high level
for a much longer time this year than usual, as a result of
it seemed wise to chlorinate our water supply. The chlorination
equipment is working satisfactorily from the mechanical stand-
point. The bacteria count has been greatly reduced, as observed
by our own laboratory and the Department of Health, and it is
operated with us in obtaining what we now consider a well pro-
cessed water supply.

Extensive improvements in our plumbing
and water lines have been made, with the idea of eliminating
cross-connections, siphonage, and danger of bacterial con-
tamination.

We are laying in a reserve supply of
plumbing, engine room, and shop fittings and supplies, against
the time when local dealers will be unable to supply us properly
as a result of the unusual treatment demands.

MAINTENANCE

Considerable painting of equipment and
buildings inside and out, will be
completed during the ensuing year.

Linoleum in the chart rooms, and in some
patients' rooms will have to be replaced, after some sixteen
years of use.

EQUIPMENT

Principal items of new and repaired
equipment are:

Dietary Department:
1 aluminum steam jacket 40 gallon kettle, \$225.00
silverware, \$227.00.
Pathology:
1 Refrigeration unit, and construction of
refrigerator, \$400.00.
Laundry:
motor repair, \$109.90.
Buildings:
new cables for elevator, and miscellaneous
repair, \$250.00.
Furnace, Westinghouse - new, \$114.00.
Repairs and renovation of storeroom, \$250.00.
Physiotherapy:
x-ray equipment, \$275.00.

Power Plant:

Repairs to Sterling Engine, \$131.00

Chlorinating equipment, \$342.00.

Surgery:

Radio knife, \$315.00.

Dermatome skin graft knife, \$135.00.

Anesthetic machine, \$592.00.

Ureteral catheters, large stock purchased from
France before the war, \$244.00.

Condensers for water stills, \$126.00.

Roger-Anderson apparatus (orthopedic) \$312.00.

X-Ray:

1 X-ray tube with fittings, \$450.00.

Total replacements and new equipment amounted
to \$12,396.05.

We are deeply grateful for the opportunity and
privilege we have enjoyed in another year of service to the
Hospital and the public. We have appreciated more than ever
the support and guidance of our Board, and the kindly interest
and understanding of our many friends.

The Statistical Summary and Departmental Reports
follow.

Respectfully submitted,

HOWARD H. JOHNSON MD
Director

Total replacement and new equipment amounting to \$18,396.05.
 X-ray tube with fittings, \$450.00.
 X-ray; \$-Ray;
 Röntgen apparatus (orthopedic) \$318.00.
 Condensers for water stills, \$135.00.
 Frame before the war, \$344.00.
 Uterine catheters, large stock purchased from
 anesthetic machine, \$251.00.
 Anesthetic machine, \$135.00.
 Radio knife, \$315.00.
 Chloroform apparatus, \$215.00.
 Apparatus to sterilize, \$111.00.
 Lower Flange

We are deeply grateful for the opportunity and privilege we have enjoyed in another year of service to the Hospital and the public. We have a great deal more than ever the support and guidance of our Board, and the kindly interest and understanding of our many friends.

The Statistical Summary and Departmental Reports follow.

Respectfully submitted,

H. AND H. JOHNSON MD
 Director

GENERAL STATISTICS - FOR THE YEAR ENDING JUNE 30, 1940

	1940	1939	1923
Patients treated during year	5334	5191	3814
Patients treated during year, including infants	5761	5587	-
Patients discharged during year	5166	5161	3616
Patients discharged during year, including infants	5580	5541	-
Patients died during year	167	158	170
Patients died during year, including infants	175	161	-
Daily average number of patients	153.3	149.7	108.8
Daily average number of patients, including infants	164.9	159.7	-
Total number of days treatment furnished	56,080	54,642	39,715
Total number of days treatment furnished, including infants	60,220	58,309	-
Total number of days free treatment furnished	6,194	5,021	-
Greatest number of patients	5/17-190	3/30-181	5/1-129
Smallest number of patients	12/24-106	7/4--102	4/1--87
Number of operations performed	4,361	4,618	3,425
Number of patients operated on during year	3,502	3,582	2,531
Number of emergency cases treated during year	2,350	2,058	-
Number of x-ray pictures taken	12,356	10,726	4,346
Number of x-ray treatments and examinations made	5,146	3,592	1,401
Number of Laboratory examinations made	34,843	29,812	16,718
Total amount expended during year	\$591,645.99	\$563,054.34	\$295,252.30
Total amount collected during year	594,684.97	576,971.44	278,749.28
Free Treatment:			
Community Chest:			
Hospitalization	\$6,676.10		
Out-patient free work ..	2,519.90		
Clinic Deficit	10,159.36		
Endowments		19,155.36	
Discount Expense		18,357.00	
Weeks' Fund Hospitalization		1,597.54	
Katharine and Harry Babcock Fund		5,802.35	
Nurses' Alumnae Hospitalization		7,811.19	
Hospital Care of Nurses		413.50	
Total Free Treatments and Discounts		2,609.95	
Cost per patient day - adults		55,746.49	28,561.02
Cost per patient day - adults and infants		10.16	7.43
Cost of subsistence per day - adults		9.52	-
Cost of subsistence per day - adults and infants		2.14	1.84
Cost of subsistence per day - adults and infants		2.01	-

REPORT OF NURSING DEPARTMENT

The following Annual Report of the Nursing Department for the year ending June 30, 1940, is hereby respectfully submitted for your consideration:

Graduate nurses	80	
Student nurses	90	
Students admitted in September 1939 ...	33	
Students who left training	7	
Health	3	
Scholarship	3	
Marriage	1	
Students on indefinite leave	2	
Students who finished training	8	
Days lost because of illness	249	(graduate nurses)
	713	(student nurses)
	98	(attendants)
Number of attendants	13	

A number of changes have occurred in the past year. The positions of Director and Assistant Director were filled on January 1, 1940. The turnover in the general staff has been very high, and replacements have been made with the best material available. Because of the higher requirements of the new Nurse Practice Act it has been difficult to fill positions in the Head Nurse and Supervisory group; we are therefore making an effort to develop these from our own staff. To do this the salaries of the better general duty nurses have been raised, in order that they may take in-service training.

Some of the things which are being done in order that better nurses may be attracted to institutional work are: (1) annual physical examinations, (2) a staff education program (3) provision of rest-rooms for use during off duty hours, (4) raising of salaries on the basis of merit. Records of data concerning all staff nurses, including letters of recommendation, previous experience, and progress on the job, are being kept.

Studies of the subsidiary workers have shown us several things, namely, that duties having no educational value were being performed by nurses and that more of these workers might be employed. To this end, we have listed duties which might be performed by these workers, have investigated applicants thoroughly, and have added two extra attendants to the staff, both of whom have had special training. We feel that we have a sufficient number for the present.

REPORT OF NURSING DEPARTMENT

The following annual report of the Nursing Department for the year ending June 30, 1940, is hereby respectfully submitted for your consideration:

Graduate nurses	80
Student nurses	90
Students admitted in September 1939	30
Students who left training	7
Health	3
Scholarship	3
Marriage	1
Students on indefinite leave	3
Students who finished training	3
Days lost because of illness	349 (graduate nurses)
.....	713 (student nurses)
.....	98 (attendants)
Number of attendants	13

A number of changes have occurred in the past year. The positions of director and assistant director were filled on January 1, 1940. The turnover in the general staff has been very high, and replacements have been made with the best material available. Because of the higher requirements of the new Nurse Practice Act it has been difficult to fill positions in the Head Nurse and Supervisory groups; we are therefore making an effort to develop these from our own staff. To do this the salaries of the better general duty nurses have been raised, in order that they may take in-service training.

Some of the things which are being done in order to better nurses may be attributed to institutional work are: (1) annual physical examinations, (2) a staff education program, (3) provision of rest-rooms for use during off duty hours, (4) raising of salaries on the basis of merit. Records of data concerning all staff nurses, including letters of recommendation, previous experience, and progress on the job, are being kept.

Studies of the subsidiary workers have shown as several things, namely, that duties having no educational value were being performed by nurses and that more of these workers might be employed. To this end, we have listed duties which might be performed by these workers, have investigated applicants thoroughly, and have added two extra attendants to the staff, both of whom have had special training. We feel that we have a sufficient number for the present.

Although the number of paid employees exceeds that of previous years, studies of the number of hours per patient show that we are still lower than we should be, according to figures of the American Nurses Association. The loss of seventeen student nurses has made imperative the employment of general duty nurses. Another thing to be considered is that a large number of the employees are relatively new, and are consequently less efficient. A more stable staff would make for better efficiency and greater happiness among the staff.

Capping Exercises for the School of Nursing were held on February 13, when 32 students were accepted into the School. Graduating Exercises took place on June first, with the usual ceremonies. An unusual feature was the conferring of two \$125.00 scholarships, given anonymously. We are grateful to the donor for the opportunity this affords the students who have proven themselves worthy of further education.

In an effort to raise the standards of the Nursing School, the teaching of Psychology has been eliminated, and we are now requiring that students take the course prior to entrance. We hope that next year we will be able to make a similar requirement regarding Bacteriology and Normal Nutrition. These courses, due to inadequate teaching facilities, cannot be taught well under the present circumstances. Elimination will enable the students to spend more time in learning actual nursing, and will lighten the teaching load considerably.

The class-rooms have been rearranged and new teaching materials are being purchased. For the first time we are going to use butcher specimens in connection with Anatomy and Physiology. Addition of five beds to the Nursing Arts Laboratory will facilitate teaching that subject, and new charts and models are being added. One new course has been added - Social Problems in Nursing Service - which will be taught by the Assistant Director of Nurses.

In order that students will be able to spend more time on the wards when they are best equipped to do actual nursing, classes for the Preliminary Period have been increased; this will lighten the burden in the last year when their time will be free of classes, and they can be of more value to the hospital.

Because of the low daily average number of patients in our Pediatric Department (8.5 per day) an affiliation for this service is both necessary and desirable. It has been arranged beginning June 1941, when six weeks will be spent in Highland Hospital, Oakland, in conjunction with the six weeks course in Communicable Disease.

The Nursing School Committee has voted an increase in tuition for the School, so that the cost is now \$250.00 for the three years.

The Nursing School Committee has voted an increase in tuition for the School, so that the cost is now \$250.00 for the three years.

Improvements are being made in the Library. Old books are being removed as being actually harmful in some instances. An attempt is being made to stock the Library with new and reliable reference books. The American Journal of Nursing is being bound for the years 1924-1939, and this is a great improvement over the old method of handling these books.

A new catalogue was edited in February 1940, and over 200 copies have been sent out to date.

An interesting program for the selection of students was inaugurated this Spring. Students were given psychologic tests to determine native ability, interest, reading ability, emotional and social adjustment, knowledge of arithmetic, and nursing aptitude. This has been done in an effort to decrease the number of students who fail to complete the course. We are very pleased with the results and have selected 37 promising girls for the Fall class. All but three of these have had some college, and 23 have had two years or over.

The present administration is of the opinion that a cooperative form of government has much value in the education of young women. A Student-Faculty Cooperative Government is being sponsored, and an attempt is being made to bring out qualities of leadership and to develop a feeling of responsibility for the welfare of the School of Nursing. Students are encouraged to bring problems to meetings, where open discussion often brings about a better understanding and cooperation between the Faculty and student body.

Out of the above has come a well-planned and directed recreational program. Besides the usual dances, teas have been given every Sunday afternoon under the direction of the various classes. An inter-class tennis tournament is being played. Tickets for the Symphony Concerts were given to us by two members of the Board of Directors, and they are very popular. A new recreation room is being fixed up under the direction of a student committee. With money given us by the Women's Board six cots were bought and put on the roof of the Nurses' Home. Nurses enjoy taking sun-baths, and we are grateful for the opportunity to do this.

A student health program has been worked out and new students are required to have laboratory work as well as immunization done before entrance to the School. The Mantoux test for tuberculosis will be done a few days after entrance.

Through the generosity of Dr. Hodgkin, and some former patients in the hospital, additions have been made to the Chapel. New hymnals with music and new linens for the Altar, as well as a new green frontal, have been given.

Through the generosity of Dr. Hodgkin, and some former patients in the hospital, additional have been made to the Chapel. New hymnals with music and new linens for the altar, as well as a new green frontal, have been given.

As the National League of Nursing Education is working on their accrediting program in an effort to have all schools of nursing accredited by them, we should be looking forward to the time when we must ask for such accreditation. Thus, there are many things that we must do in order that the School may be brought up to the standards acceptable to the League.

It is recommended that Medical and Surgical Nursing should be integrated with related courses and with each other, and we would like to work out a good teaching program along those lines. This would necessitate meetings of medical and surgical, as well as nursing faculties, and will probably take more than a year to work out, but it should be better teaching and eliminate much duplication.

Another thing which is badly needed is an extra person in the Nurses' Home. Girls who are paying a high tuition should not be asked to clean their own rooms. One additional person, preferably a House Mother, who could answer the door and the telephone, see that rooms are kept in good order, do the ordering, etc., would release two maids there now for cleaning. This person could also act as Librarian during the daytime. She should be a fairly young person, and a nurse.

As we are making an effort to improve other things pertaining to the education of the students, we feel that we should try to improve the educational qualifications of the faculty, head nurses, and supervisors. These groups are being urged to attend classes at the University Extension, and their hours are being arranged to give them freedom to do so.

At some future time we should like to see another full-time supervisor on the staff. This person would be called a Teaching Supervisor, and her duties would include assisting head nurses in organizing and administering their wards, teaching and supervising ward procedures, conducting ward conferences, etc.

New furniture is needed in the Nurses' Home, both in the living rooms and in the students' bedrooms. The Home is very crowded, and single rooms are being used as double ones in many instances.

May we thank the Board for the kind cooperation which they have given us in all instances? It is most gratifying to know that we can count on the Board for encouragement and assistance at all times.

Respectfully submitted,

Virginia H. Harrison, R.N.
Director of Nurses

Respectfully submitted,

Virginia H. Harrison, R.N.
Director of Nurses

LABORATORY REPORT

Year Ending June 30, 1940

During the fiscal year the laboratory has performed 34,843 different tests - more than have ever been performed in the history of the hospital. This number represents a 17% increase over last year. Of this increase Wassermann tests have constituted over 50%. This is due both to our low fee for the test and to the new State law requiring pre-natal and pre-marital blood examinations for laboratory evidence of syphilis. Excluding the Wassermann increase, general laboratory work has increased 8% above 1939.

In addition to seven technicians, the laboratory now has one student technician here for a period of five months. Beginning in October 1940, we will have one student in the department for a years training. In six months another will be added, so that at any one time there will be two in the department.

We regret the loss of Miss Margaret Klingbeil who left November 1939, after four years service, to assume domestic duties.

There have been no major improvements or additions. Minor repairs and additions continue.

Respectfully submitted,

David G. Mason, M.D.
Pathologist

REPORT OF THE X-RAY DEPARTMENT

Year Ending June 30, 1940

A total of 12,356 roentgenograms have been taken and 606 fluroscopic examinations have been done during the past year. There has been a total of 4,126 examinations made and 1,020 treatments given. There is, accordingly, an increase of 534 examinations and a decrease of 197 treatments from the corresponding period of the previous year.

There has been no new equipment installed, nor changes made in this department during the past year. The equipment has been kept in repair and at maximum state of efficiency.

The department is well equipped, but needs more space for dressing rooms, waiting room and office.

Respectfully submitted,

Charles C. Fulmer, M.D.

REPORT OF THE X-RAY DEPARTMENT

Year ending June 30, 1940

A total of 15,358 roentgenograms have been taken and 806 fluoroscopic examinations have been done during the past year. There has been a total of 4,126 examinations made and 1,080 treatments given. There is, accordingly, an increase of 534 examinations and a decrease of 197 treatments from the corresponding period of the previous year.

There has been no new equipment installed, nor changes made in this department during the past year. The equipment has been kept in repair and at maximum state of efficiency.

The department is well equipped, but needs more space for dressing rooms, waiting room and office.

REPORT OF THE PHYSICAL THERAPY DEPARTMENT

Year Ending June 30, 1940

This department treated a total of 3,136 patients during the year ending June 30, 1940. During the previous year 2,025 patients were treated, showing an increase of 1,111.

A new piece of equipment, called a Synchrostat, was purchased. This machine delivers galvanic current and oscillating sinusoidal current. It is used chiefly in causing rhythmic contractions of muscles and is designed to treat up to eight muscle groups simultaneously.

Respectfully submitted,

Charles C. Fulmer, M.D.

REPORT OF THE PHYSICAL THERAPY DEPARTMENT

Year ending June 30, 1940

This department treated a total of 3,133 patients during the year ending June 30, 1940. During the previous year 2,082 patients were treated, showing an increase of 1,111.

A new piece of equipment, called a Synchronostat, was purchased. This machine delivers galvanic current and oscillating sinusoidal current. It is used chiefly in causing rhythmic contractions of muscles and is designed to treat up to eight muscle groups simultaneously.

Charles C. Palmer, M.D.

REPORT OF THE OUT-PATIENT AND SOCIAL SERVICE
DEPARTMENTS

I have the honor to submit the report of the Out-Patient and Social Service Departments for the year ending June 30, 1940.

There has been a slight increase in the number of patient visits and new cases; 19,930 visits were made to all clinics; 1,484 new applicants were accepted.

2,561 visits were made by State and County Relief clients, authorized for medical service by the Central Medical Bureau and the Public Welfare Department. For these, at 65¢ a visit, St. Luke's received \$1,644.65; the cost to us at regular selling prices being \$1,853.80. 15 patients from Sharp Park Project received 452 days hospitalization on a part-pay basis; the State Relief Administration paying \$2,223.03, and the balance of \$577.32, charged to General Endowment. 21 children had Tonsilleotomies for which the State Relief Administration paid \$15.00 each.

1,911 home calls were made by the Clinic Visiting Nurse. This service was discontinued February 15, 1940. On careful study, it was found that there was duplication with existing Public Health Nursing service in the district, and that many calls received no answers. Where nursing service is required in the home, the Visiting Nurses' Association is used. To date, we have had good cooperation from them, both in the care of the patient and the reporting for our records. Each of the Student Nurses while on Out-Patient Service, spends two mornings home visiting with these Nurses.

Through the Children's Auxiliary Fund, 7½ days, 8 evenings, and 14½ nights Special Nursing services were given to children. Total charges were \$274.50. Contributions totalled \$420.50. Balance in the Fund June 30, 1940, was \$1,057.06.

91 Patients received glasses through the Edward F. Glaser Fund at a cost of \$564.49. Reimbursements, in small monthly payments, totalled \$259.56, and donations \$366.57. Balance in the Fund June 30, 1940, was \$151.43.

Our 1940 Community Chest budget is \$1,344.00 less than in 1939. By reducing operating expenses, we are endeavoring to give the same service to as many ambulatory and hospital patients as previously.

REPORT OF THE OUT-PATIENT AND SOCIAL SERVICE DEPARTMENT

I have the honor to submit the report of the Out-Patient and Social Service Department for the year ending June 30, 1940.

There has been a slight increase in the number of patient visits and new cases; 19,930 visits were made to all clinics; 1,434 new applicants were accepted.

2,561 visits were made by State and County Relief clients, authorized for medical service by the Central Medical Bureau and the Public Welfare Department. For these, at \$25 a visit, St. Luke's received \$1,644.85; the cost to us at regular selling prices being \$1,853.80. 15 patients from Sharp Park Project received 458 days hospitalization on a part-pay basis; the State Relief Administration paying \$8,233.03, and the balance of \$577.02, charged to General Endowment. 21 children had Tonsillotomies for which the State Relief Administration paid \$15.00 each.

1,911 home calls were made by the Clinic Visiting Nurse. This service was discontinued February 15, 1940. On careful study, it was found that there was duplication with existing Public Health Nursing service in the district, and that many calls received no answers. Where nursing service is required in the home, the Visiting Nurses' Association is used. To date, we have had good cooperation from them, both in the care of the patient and the report- ing for our records. Each of the student nurses while on Out-Patient Service, spends two mornings home visiting with these Nurses.

Through the children's auxiliary fund, 77 days, 3 evenings, and 144 nights special nursing services were given to children. Total charges were \$274.50. Contributions totaled \$480.50. Balance in the fund June 30, 1940, was \$1,037.00.

61 patients received classes through the Edward J. Glasser Fund at a cost of \$584.49. Reimbursements, in small monthly payments, totaled \$529.58, and donations \$55.37. Balance in the fund June 30, 1940, was \$151.45.

Our 1940 Community Chest budget is \$1,344.00 less than in 1939. By reducing operating expenses, we are endeavoring to give the same service to as many ambulatory and hospital patients as previously.

Once again, our children were given a marvelous Christmas Party. Each child received a pair of fitted shoes, a toy, candy and ice cream. Mrs. George A. Pope, who donated \$100.00, and the Women's Board a like amount, furnished the shoes. Mrs. William P. Roth and the Misses Berenice and Lurline Roth, gave some exquisite dolls and toys. The employees of the Emporium, and a new group, employees of the Pacific Telephone Company, donated a large number of lovely toys and dolls. To all of these, and to the other participants and smaller donors, we are deeply grateful.

We wish to especially thank the Women's Board, not only for their generous donation, but also for their supporting interest and promise of assistance in the sponsoring of these Christmas Shoe Parties.

The Clinic and Hospital work accomplished was made possible by the cooperation and excellent services furnished by the members of our Hospital and Out-Patient Staffs and by the helpful counsel of our Supervisor, Dr. L. B. Coblentz.

Statistical report follows.

Respectfully submitted,

Marguerite Zorin, R.N., S.W.
Director of Social Service

Once again, our children were given a marvelous Christmas party. Each child received a pair of fitted shoes, a toy, candy and ice cream. Mrs. George W. Pope, who donated \$100.00, and the women's board a like amount, furnished the shoes. Mrs. William F. Roth and the Misses Berenice and Lurline Roth, gave some exquisite dolls and toys. The employees of the Auditorium, and a new group, employees of the Pacific Telephone Company, donated a large number of lovely toys and dolls. To all of these, and to the other participants and smaller donors, we are deeply grateful.

We wish to especially thank the Women's Board, not only for their generous donation, but also for their supporting interest and promise of assistance in the sponsoring of these Christmas shoe parties.

The Clinic and Hospital work accomplished was made possible by the cooperation and excellent services furnished by the members of our Hospital and Out-Patient Staffs and by the helpful counsel of our supervisor, Mr. L. E. Gohlert.

Statistical report follows.

The Directors of St. Luke's Hospital
San Francisco, California

Gentlemen:

The Report of the present Chaplain dates from the first week of January 1940 to June 30, 1940.

During this period of time there have been forty-two Services held in the Chapel, of which fourteen were Celebrations of the Holy Communion, with Communion administered to twenty-seven sick persons beside those attending the Services in the Chapel, and of which Services, four were Baptisms.

The Chapel has been cared for by an Altar Guild of young women in Training, one of whom has made a green Altar hanging, which has added much to the attractiveness of the Chapel during the Post-Trinity Season. The Guild has attended to decorations as well as the preparation for the Communion Services.

The Chaplain has been greatly assisted in his work by the interest of Miss Virginia Harrison, as well as by the organist, Mr. Ritschey.

Twice during this period when the Chaplain has been out of town, the Rev. Harold Brewster has taken the Tuesday evening Service.

The Chaplain has no record of calls and visits made during the month of January, when he was finding his way around. Since then eight hundred and sixteen calls have been made on Episcopalians, besides visits to most of the people in the wards from three to four times a week. The calls on Ward patients have grown in number till they run well over one hundred a week.

In every way there has been a thorough-going co-operation from all persons connected with the Hospital, and the Chaplain wishes to express to Dr. Johnson and the whole staff, non-medical as well as medical, his appreciation of that cooperation.

Respectfully submitted,

W.R.H. Hodgkin, Chaplain

The Directors of St. Luke's Hospital
San Francisco, California

Gentlemen:

The Report of the present Chaplain dates from the
first week of January 1940 to June 30, 1940.

During this period of time there have been forty-
two services held in the Chapel, of which fourteen were
celebrations of the Holy Communion, with Communion adminis-
tered to twenty-seven sick persons besides those attending
the services in the Chapel, and of which services, four
were Baptisms.

The Chapel has been cared for by an Altar Guild
of young women in Training, one of whom has made a green
Altar hanging, which has added much to the attractiveness
of the Chapel during the Post-Trinity season. The Guild
has attended to decorations as well as the preparation
for the Communion services.

The Chaplain has been greatly assisted in his work
by the interest of Miss Virginia Harrison, as well as by
the organist, Mr. Hittsney.

Twice during this period when the Chaplain has been
out of town, the Rev. Harold Brewster has taken the Tuesday
evening service.

The Chaplain has no record of calls and visits made
during the month of January, when he was finding his way
around. Since then eight hundred and sixteen calls have
been made on episcopals, besides visits to most of the
people in the wards from three to four times a week. The
calls on ward patients have grown in number till they run
well over one hundred a week.

In every way there has been a thorough-going co-
operation from all persons connected with the Hospital, and
the Chaplain wishes to express to Dr. Johnson and the whole
staff, non-medical as well as medical, his appreciation of
that cooperation.

Respectfully submitted,

W.A.H. Hodekin, Chaplain

REPORT OF THE WOMEN'S BOARD

The Women's Board of St. Luke's Hospital met on the second Friday of every month during the last year with the exception of June, July and August. Two members of the Board visited the Hospital each month to keep in touch with the appearance and cleanliness of the Hospital, and to learn and understand the problems of the moment, both of the Hospital and the Nursing School.

In June 1939 discussions were held as to whether the Board would be more efficient in its present status of a non-executive Board, or as an Auxiliary under an executive committee. A questionnaire was sent to each member, the results showing eight votes to remain the same, and six for the change. Those wanting the change hoped for an enlarged income which would increase the scope of activities. Those wishing to remain the same thought the present activities sufficient, and the membership ample to carry on our present work.

In November the Board received the resignations of four members: Mrs. Noble, Mrs. Bogert, Mrs. Taylor, and Miss Drown. These were accepted with much regret.

The Children's Auxiliary Birthday Club membership continued about the same during the year. In September 1939 the balance on hand was \$892.00; in June 1940 it was \$1050.00.

We were very pleased to be able to give the Clinic Christmas Party \$100.00 for childrens' shoes, beside our regular gifts to the Head Nurses. Also, during the winter we added to the usual expenses by donating flowers once a week for two months to decorate the Hospital.

On April fourth the Board gave a large reception tea for Miss Harrison. There were about 500 guests invited, including Staff, Courtesy Staff, and Visiting Doctors, the Clergy, active Alumnae, Directors, donors and special ex-patients. Many donations of food and flowers were gratefully accepted, which helped to make the party a great success.

During the spring we were glad to add to the Board three new members: Mrs. Frank Deering, Mrs. Arthur Towne, and Mrs. Russell Dickson.

The Decorating Committee had the responsibility of only one real project, that of completely furnishing Miss Harrison's rooms in the Nurses Home.

REPORT OF THE BOARD

The Woman's Board of St. Luke's Hospital met on the second Friday of every month during the last year with the exception of June, July and August. Two members of the board visited the Hospital each month to keep in touch with the appearance and cleanliness of the Hospital, and to learn and understand the problems of the Hospital, both of the Hospital and the Nursing School.

In June 1939 discussions were held as to whether the Board would be more efficient in its present status or a new executive board, or an auxiliary under an executive committee. A questionnaire was sent to each member, the results showing eight votes to retain the board, and six for the change. Those wanting the change hoped for an enlarged income which would increase the scope of activities. Those wishing to remain the same thought the present activities sufficient, and the membership ample to carry on our present work.

In November the Board received the resignations of Mrs. Hobbie, Mrs. Bogert, Mrs. Taylor, and Miss Brown. These were accepted with much regret.

The Children's Auxiliary held their 41st membership conference about the same time during the year. In September 1939 the balance on hand was \$892.00; in June 1940 it was \$1050.00.

We are very pleased to be able to give the Children's Christmas Party \$100.00 for children's shoes, besides our regular gifts to the Head Nurses. Also, during the winter we added to the usual expenses by donating flowers once a week for two months to decorate the Hospital.

On April fourth the Board gave a large reception for Mrs. Harrison. There were about 500 guests invited, including staff, courtesy staff, and visiting doctors, the clergy, active alumnae, directors, donors and special ex-patients. Many donations of food and flowers were gratefully accepted, which helped to make the party a great success.

During the spring we were glad to add to the Board three new members: Mrs. Frank Beattie, Mrs. Arthur Brown, and Mrs. Russell Jackson.

The Nursing Committee had the responsibility of only one full project, that of completely furnishing the Harrison's room in the Nurses Home.

As always, the Women's Board is very anxious to be of any possible help to the Hospital and the Nurses' School, and is doing its best to fill its special role as effectively as it can, to understand the problems and wants of the entire personnel, and to keep the standards and fine name of the Hospital as a whole up to its former splendid tradition.

Respectfully submitted,

Caroline R. Chickering

as always, the women's board is very anxious to be of
any possible help to the hospital and the nurses' union,
and is doing its best to fill its special role as effectively
as it can, to understand the problems and needs of the entire

REPORT OF THE DEPARTMENT OF MEDICAL RECORDS

The following is a statistical report for the year ending June 30, 1940, which covers the work of the various Hospital Departments, and also includes a summary of the "Causes of Death" - based on 5712 cases discharged during this period.

DEPARTMENTAL WORK BY SERVICES

<u>Department</u>	<u>Cases Treated</u>
<u>Medicine:</u>	
General Medicine	1228
Pediatrics	535
Psychiatry	32
Dermatology	7
	<u>1802</u>
<u>Surgery:</u>	
General Surgery	1599
Genito-urinary	498
Gynecology & Obstetrics	951
Orthopedic	371
Otorhinolaryngology	608
Oral	22
Neuro-surgery	20
Eye	<u>107</u>
	<u>4176</u>

The most important problem of the year in the Record Department was a change in handling Nurses Notes, due to the fact that filing space is becoming extremely limited, and the bulk of the Records must be eliminated as far as possible.

In the future, Nurses Notes will remain in the Records for only three months after the patient has left the Hospital, after which they will be removed, filed in the basement by date of discharge (for two years), and eventually destroyed. As all important happenings appear either on the graphic chart or in the Doctor's notes, this procedure does not lessen the value of the Record, but complies with a State law and protects the Hospital medico-legally. In case of minors, the Nurses Notes will not be destroyed until two years after the minor becomes of age, i.e., 21 years.

The records of all "Come and Go" cases will be retained, filed separately, in the X-ray vault, instead of being kept one year, which was the previous arrangement.

REPORT OF THE DEPARTMENT OF MEDICAL RECORDS

The following is a statistical report for the year ending June 30, 1940, which covers the work of the various Hospital Departments, and also includes a summary of the "Causes of Death" - based on 6718 cases discharged during this period.

DEPARTMENTAL WORK BY SERVICES

Department	Cases Treated
<u>Medicine:</u>	
General Medicine	1388
Pediatrics	555
Psychiatry	23
Dermatology	7
	<u>1973</u>
<u>Surgery:</u>	
General Surgery	1599
Genito-urinary	499
Gynecology & Obstetrics	951
Orthopedic	371
Otorhinolaryngology	608
Oral	23
Neuro-surgery	80
Eye	107
	<u>4178</u>

The most important problem of the year in the record department was a change in handling Nurse Notes, due to the fact that filing space is becoming extremely limited, and the bulk of the records must be eliminated as far as possible.

In the future, Nurse Notes will remain in the records for only three months after the patient has left the hospital, after which they will be removed, filed in the basement by date of discharge (for two years), and eventually destroyed. As all important happenings appear either on the graphic chart or in the Doctor's notes, this procedure does not lessen the value of the record, but complies with a state law and protects the hospital medico-legally. In case of minor, the Nurse Notes will not be destroyed until two years after the minor becomes of age, i.e., 21 years.

The records of all "Come and Go" cases will be retained, filed separately, in the X-ray vault, instead of being kept one year, which was the previous arrangement.

Medical Records were consulted for research work in four different series.

The first group of Records was used by a representative of the U.S. Department of Public Health, for a series of Pneumococcus Pneumonia cases for collective statistics. About 100 records were abstracted.

The second group of Records to be consulted was for Dr. A.E. Edgerton for follow-up work on 100 cases of Retinitis of the New Born.

The third group was used by Dr. Cooley in collective statistics for the purpose of writing a paper on Appendectomy for acute appendicitis during pregnancy. Our contribution to this series was 25 cases.

The fourth group of Records was used by Dr. G. D. Delprat, for a paper on 100 cases of Congenital Pyloric Stenosis in which he had performed a Fredet-Ramstedt pyloroplasty. Approximately 40 Records were abstracted at St. Luke's Hospital, the remainder from Children's Hospital.

The paper being prepared by Dr. Delprat on Appendicitis, upon which so much work was done during the previous year, is still unfinished (due to Dr. Delprat's illness). It will be completed in the near future.

Respectfully submitted,

Genevieve Clark Hirschler
Medical Records Librarian

Medical Records were consulted for research work in four different series.

The first group of records was used by a representative of the U.S. Department of Public Health, for a series of Pneumococcus pneumonia cases for collective statistics. About 100 records were abstracted.

The second group of records to be consulted was for Dr. A. J. Edgerton for follow-up work on 100 cases of Leishmaniasis of the New Born.

The third group was used by Dr. Cooley in collective statistics for the purpose of writing a paper on appendicitis for acute appendicitis during pregnancy. Our contribution to this series was 25 cases.

The fourth group of records was used by Dr. D. D. Delpy, for a paper on 100 cases of Congenital Pyloric Stenosis in which he had performed a Fredet-Ramstedt pyloroplasty. Approximately 40 records were abstracted at St. Luke's Hospital, the remainder from Children's Hospital. The paper being prepared by Dr. Delpy on appendicitis upon which so much work was done during the previous year, is still unfinished (due to Dr. Delpy's illness). It will be completed in the near future.

SUMMARY OF CASES OF DEATH

CASES REPORTED	175
Institutional	130
Non-institutional	45

DIAGNOSES

Abscess of lung	
with pleural effusion	1
with bronchopneumonia, post-operative	1
" " and diabetes mellitus ...	1
Adenocarcinoma	
Bile ducts, with obstruction; also duodenal ulcer	
with pyloric stenosis; and gastric hemorrhage	
post-operative	1
Breast, with metastasis to lungs	1
Cecum, with rupture and peritonitis	2
Cervix, with metastasis to pelvis, and	
occlusion of ureters	1
Colon, with shock, post-operative	1
Ovary, with metastases, general	1
Prostate, with metastases, general	1
Rectum, with obstruction, intestinal, post-op.	
and general peritonitis	1
" with pelvic peritonitis	1
Sigmoid, with metastases	1
Agranulocytic angina	1
Alcoholism, chronic	
with Bromism, acute	1
with toxic hepatitis, myocarditis, and Nephritis.	1
Anemia, pernicious, with cachexia	1
Aneurysm	
Aortic, with rupture	2
" with thrombus formation & cardiac hyper.	1
Cerebellar, with rupture	1
Appendicitis, acute	
with bronchopneumonia	1
with gangrene, and peritonitis	1
with rupture, and acute dilatation of stomach ..	1
" " and peritonitis	1
Arteriosclerosis	
Coronary, with heart block	1
General, with cardiac failure	1
General, with thrombosis, coronary	1
